activity takes place. It is also a valuable resource for courses in mathematics education in the teacher education colleges, and departments of education in the sub-Saharan Africa region. In the increasingly global and technological world mathematics is seen as a significant gatekeeper of opportunities for social and economic advancement and mobility. Hence, countries and development agencies in the broader sub-Saharan Africa region are looking towards increasing access to relevant and high-quality secondary education as a lever towards economic development. Policy makers and other key decision makers in education look towards improvement in mathematics teaching and learning as a key focus in education reform. In the East Africa region also a number of initiatives have been taken at the national level in the respective countries to improve the quality

It has been said before that Africa is one of the richest continents in the world but the poorest and colonialism was blamed for Africa's problems before the continent was liberated. Although some leaders still blame colonialism for the poverty that is ravaging the continent today, it cannot be denied that poor governance, corruption, greed among many other ills are causing Africa's current problems. The essays in this collection *The Gods Sleep Through It All* discusses Africa's leadership problems and how most countries still rely on former colonisers for help despite boasting of untold natural wealth. The essays discuss the corruption of political parties and politics in Africa and question why African countries readily open their arms to countries like China but close borders to

Through qualitative research methods, this book engages in a holistic understanding of cultural, economic, and institutional forces that interact to produce the underrepresentation of women as school teachers in four sub-Saharan African countries. Comparative case studies at the national level, using a common research design, show that teaching, despite being an attractive civil service job, offers low salaries and many challenges, especially when it takes place in rural areas. Combining professional duties with demanding family responsibilities further diminishes women's ability to stay in the teaching profession. The studies in this book attempt to bridge research findings with policy by developing action plans in cooperation with ministries of education of

the respective countries. Women Teachers in Africa will be of interest to academic researchers, undergraduate and postgraduate students in the relevant fields, as well as development professionals, aid agency staff and education policy experts.

This engaging undergraduate textbook uses research relevant to students' lives to teach research methodology.

Spurred by the success of the first stress test of US banks toward the end of the global economic crisis in 2009, stress testing of large financial institutions has become the cornerstone of banking supervision worldwide. The aim of the tests is to determine which banks are adequately capitalized under severe economic shocks and to order corrective measures for those that are vulnerable. In

Banking 's Final Exam, one of the world 's leading experts on banking regulation concludes that the tests administered on both sides of the Atlantic suffer from fundamental weaknesses, leading to a false sense of reassurance about the safety and soundness of the banking system. Some weaknesses can be corrected within the existing bank-capital regime, but others will require bold reforms—including higher minimum capital requirements for the largest and most systemically-important banks. The banking industry is likely to resist these reforms, but this book explains why their objections do not hold water.
