The Second World War stranded a colony of British writers in Egypt, where they lived on the borderland of an alien culture and a distant British homeland. This study concentrates on four important poets - Keith Douglas, Lawrence Durrell, Bernard Spencer, and Terence Tiller - the journal with which they were associated, *Personal Landscape*, and the milieu of wartime Cairo. On the periphery of this group were, among others, Olivia Manning and G. S. Fraser, and the Greek exiles George Seferis and Elie Papadimitriou. Cairo's "unreality" - the war in the Western Desert, cultural otherness and the varied definitions of exile,

the layers of a native and an imperial history, the currents of political propaganda, literary rivalries played out far from the metropolitan center - formed the background to the growth of these four distinct poetic voices, as well as the establishment of a magazine that promoted a modernist aesthetic and a canon that embraced contemporary Greek letters.

A reference to the nation's shortest officially declared war offers information on campaigns and principal

battles, key military and political figures, and political aspects of the Spanish-American and Phillipine-American Wars.

The core of this text comprises chapters on all the key issues of business in Canada today. Each chapter includes a hypothetical case study and an introduction highlighting key ethical points; two academic essays; and a real-life case study. Questions for discussion accompany the essays and case studies. The author has also included a general introduction to ethical issues and an overview of ethical theory; a section on

institutionalizing ethics (discussing ethics officers/programs/codes etc.); and appendices providing excerpts from important classic contributions to ethical theory and from relevant Canadian law.

This revised Sesquicentennial edition of Noah Andre Trudeau's *The Last Citadel*, which includes updated text, redrawn maps, and new material, is a groundbreaking study of the most extensive military operation of the Civil War—the investment of Petersburg, Virginia. The Petersburg campaign began on June 9, 1864, and ended on April 3, 1865, when

Federal troops at last entered the city. It was the longest and most costly siege ever to take place on North American soil, yet it has been overshadowed by other actions that occurred at the same time period, most notably Sherman's famous "March to the Sea," and Sheridan's celebrated Shenandoah Valley campaign. The ten-month Petersburg affair witnessed many more combat actions than the other two combined, and involved an average of 170,000 soldiers, not to mention thousands of civilians who were also caught up in the maelstrom. By its bloody end, the Petersburg campaign would add more than 70,000 casualties to the war's total. Petersburg was the key to the war in the East. It lay astride five major railroad

lines that in turn supplied the Confederate capital, Richmond. Were Petersburg to fall, these vital arteries would be severed, and Richmond doomed. With the same dogged determination that had seen him through the terrible Overland Campaign, Lieutenant General Ulysses S. Grant fixed his sights on the capture of Petersburg. Grant's opponent, General Robert E. Lee, was equally determined that the "Cockade City" would not fall. Trudeau crafts his dramatic and moving story largely through the words of the men and women who were there, including officers, common soldiers, and the residents of Petersburg. What emerges is an epic account rich in human incident and adventure. Based on exhaustive research into official records and

unpublished memoirs, letters, and diaries, as well as published recollections and regimental histories, *The Last Citadel* also includes 23 maps and a choice selection of drawings by on-the-spot combat artists. With *The Last Citadel*, the Petersburg campaign at last emerges from the shadows to take its rightful place among the unforgettable sagas of the Civil War.

The Ivory Tower and the Marble Citadel opens up a new way of pursuing the critical development of political philosophy in today's intercultural intellectual arena. Metzger holds that political philosophies are linguistically unavoidable efforts to infer the principles of morally legitimate government from a maximally

enlightened conceptualization of the universal human condition. Because these efforts depend on a vocabulary embodying culturally inherited premises, textual analysis uncovering these premises and debate about how they should be revised are crucial for the improvement of political philosophy.
