What is the design of the mind? What does that design imply for education? This comprehensive and engaging introduction to human learning and its applications to education focuses on these vital questions by exploring the theories of knowledge, complex cognition, and human intelligence, presenting a clear and interesting overview of the human mind through multiple theoretical lenses. The author delineates how the mind has a clear design, or architecture, that explains simple acts of memory and complex cognition, to highly creative acts and leaps of scientific or artistic insight. Topics covered
