The book examines several models which have been advocated for a workable and acceptable solution to the Kurdish problem which would be absolutely necessary for stability in the West Asian region. The book evaluates how the more than two-decade long experience of Kurdish self-rule in a democratic framework in Iraqi Kurdistan affects the debate over the other Kurdish regions in West Asia. With Turkey's European Union accession process contributing to the opening of the political space to ethno-nationalism, there is a need for a non-military solution to the Kurdish issue. The book analyses the role of Kurdish diaspora which plays a significant part in placing the Kurdish question on the European political agenda. It also examines the role of the Kurds in the aftermath of the Arab Spring and the changing geopolitics in the region. Now, the Kurds maintain the strongest platform in battling against the ISIS terrorists.

The world's first attempt at a scholarly historicisation of the African crisis of development, this book interrogates the problem of national integration within the context of ethno-religious and cultural pluralism. Here, top scholars offer refreshing insight into the prospects for transforming Africa into a super-power of the third millennium. The breadth and depth of coverage and analytical rigour unites the essays, providing one of the most comprehensive and authoritative treatments of the subject in recent years.

This edited collection is a global history of workers' organisations since 1919, the year when the International Labour Organisation (ILO), the Comintern and the International Federation of Trade Unions were formed. This historical moment represents a caesura in labour history as it epitomises the beginning of what the editors and the contributors in this book call the internationalisation of the labour question. The case studies in this centenary volume analyse the relationship between global workers' organisations and the new ideological confrontation between liberal capitalism, socialism and communism since the Bolshevik Revolution in Russia. Workers' organisations, trade unions in particular, grew in importance and managed to organise internationally, forming alliances cemented by ideology and sustained by international institutional bodies or centrals. In the nascent capitalist versus communist struggle, trade unions thrived. Is it mere coincidence that today's decline of unionism coincides with the end of ideological antagonism? This book emphasises important global labour issues such as gender as well as international workers' histories from Latin America, Asia and Africa.

The "tragedy of the commons" is a central concept in human ecology and the study of the environment. It has had tremendous value for stimulating research, but it only describes the reality of human-environment interactions in special situations. Research over the past thirty years has helped clarify how human motivations, rules governing access to resources, the structure of social organizations, and the resource systems themselves interact to determine whether or not the many dramas of the commons end happily. In this book, leaders in the field review the evidence from several disciplines and many lines of research and present a state-of-the-art assessment. They summarize lessons learned and identify the major challenges facing any system of governance for resource management. They also highlight the major challenges for the next decade: making knowledge development more systematic; understanding institutions dynamically; considering a broader range of resources (such as global and technological commons); and taking into account the effects of social and historical context. This book will be a valuable and accessible introduction to the field for students and a resource for advanced researchers.

Brings together renowned and emerging critical voices to respond to the questions raised by the concept of the 'post-colonial'. The contributors explore the diverse cultures which are shaping our global future.
