Executive Briefing: BS 8001 - a Guide - edie.net

BS 8001 - A new standard is available. Our current economic model is dominated by a linear approach to consumption and production, where materials are grown or extracted, then made into goods which are used and then disposed of. Whilst the circular economy — where resources are recovered at their highest quality and kept in circulation for as long as possible — is not a new concept, it has become increasingly popular in recent years as more businesses seek an alternative to our current ...

The proposed SDN would take stock of the current debate on the shape that monetary policy should take after the crisis. It revisits the pros and cons of expanding the objectives of monetary policy, the merits of turning unconventional policies into conventional ones, how to make monetary policy frameworks more resilient to the risk of being constrained by the zero-lower bound going forward, and the institutional challenges to preserve central bank independence with regards to monetary policy, while allowing adequate government oversight over central banks ' new responsibilities. It will draw policy conclusions where consensus has been reached, and highlight the areas where more work is needed to get more granular policy advice.
