This proceedings volume representing the second International Thermal Spray Conference (May 2004, Osaka, Japan) contains 232 papers and 93 poster presentations. Arrangement is in sections on applications, characterization methods for coating properties, coating technologies for vehicle engines, cold spray, consumables for thermal spraying, corrosion protection, economics and quality, HVOF processes and materials, innovative equipment and process technology, modeling and simulation, nanostructured materials, photocatalytic materials, process diagnostics, protective coatings against wear and erosion, and thermal barrier coatings. No index is provided, but the included CD- ROM presumably contains the contents in a searchable format. Annotation :2004 Book News, Inc., Portland, OR (booknews.com).

Schweißen ist nach wie vor das wichtigste Fügeverfahren. Neben der unübertroffenen Wirtschaftlichkeit erlaubt es konstruktive Ausführungen, die in hohem Maße die Bedürfnisse nach Flexibilität und Gewichtsoptimierung berücksichtigen. Dieses Buch stellt alle relevanten und modernen Verfahren der Schweißtechnik vor und gibt umfassende Informationen zur anforderungs- und anwendungsgerechten Gestaltung von Schweißkonstruktionen. Wirtschaftlichkeitsbetrachtungen und ein Kapitel zur Qualitätssicherung geben wichtige Hinweise für die Praxis. Im Anhang befinden sich zahlreiche Tabellen für die richtige Einstellung der Schweißparameter sowie ein Auszug zu Normen.
