The miniature web applications known as gadgets (or widgets) are a key component of the distributed web and an ideal way to publish your content far beyond the reach of your own web site. Packaging web content and functionality into a gadget enables it to be seen anywhere from iGoogle to the iPhone—wherever the user may be, on or off the traditional web. Everyone can access your content without having to visit your web site. This book is a practical guide to building gadgets that will work everywhere, from handheld devices to any site on the web. The core methodology is to develop a single code base that will run on all platforms, multiplying the syndication opportunities for maximum return on your development investment. Extending this approach is a technique of abstracting key API calls from the various gadget platforms into a single interface layer, implemented in the book as a compact JavaScript class, allowing your gadgets full access to every platform's power without your having to rewrite your code for each. Learn the key concepts for successfully syndicating web content via gadgets. Build platform-agnostic gadgets that run on all the major web portals. Deploy your gadgets to web-enabled handheld devices.

How would you like to share your calendar, access your e-mail, or create and share documents, all online from your smartphone/mobile device, netbook, or desktop? If you answered yes, then you should know that the best of all these online applications and services are being offered for free, from one of the Internet's biggest names, Google. These apps are in an online suite of productivity and fun applications called Google Apps. Getting Started with Google Apps gets you started collaborating and creating with Google's online suite of applications on the Chrome operating system—analogueous to using Microsoft Office on Windows. The differences are that Google Apps and Chrome are mostly free and run entirely on the Web. With this book, you get clear and easy-to-use instructions for getting up and running with basic Google Apps like Gmail, Google Voice, and more. Moreover, you get detailed visuals and step-by-step explanations on the more sophisticated Google apps like Google Docs, Spreadsheets, Presentations, SketchUp, and more. So get going and have some fun while you're at it.
