The U.S. economic crisis of 2008 isn't over! The next bubble, explosive government debt, is brewing. At the same time, the economy can't generate growth, the treasury is exhausted, the Fed's balance sheet is over-stressed, consumers remain deep in debt, and short-term interest rates are at near-zero. Intelligent investors can't just mourn the death of easy profits: they want and need new strategies for success through history's potentially worst equity market. In Market Upside Down, Dr. Vinh Q. Tran presents those strategies. Tran begins by explaining why the U.S. financial crisis will only get worse. He then provides professional and active investors a comprehensive framework for profiting in an upside down market that could last for decades. Drawing on his market expertise, as well as experience as money manager to institutional and wealthy investors, Tran shows how to build wealth and generate return in times of crisis with a focus on what will matter most in the coming years: liquidity and risk management. Tran helps investors explore global investments and opportunities that won't depend on the troubled U.S. economy or a reinvigorated market soaring, and shows how to profit from the coming age of scarcity. Along the way, he demonstrates how to use fixed income, hedge funds, and non-traditional investments, with minimal equity risks to create a portfolio that is positioned to provide liquidity, profits and importantly to weather future crises.
