Burn injuries are recognised as a major health problem worldwide, causing morbidity and mortality in individuals of all ages. The Oxford Specialist Handbook of Burns is a concise, easy-to-navigate reference text that outlines the assessment, management, and rehabilitation of burns patients. With contributions from international experts, this handbook covers all aspects of burn-patient care, from first aid to reconstructive techniques and physiotherapy. This new, pocket-sized title is an invaluable resource for all those who come into contact with burns patients, from accident and emergency doctors to allied health professionals, as well as specialists and trainees in burns units. Filling an

Important niche in the market for an accessible quick-access guide for those first on the scene, The Oxford Specialist Handbook of Burns is a comprehensive and detailed new resource.

"This is an excellent text which covers all of the important research methods in the field, including randomised control trials. A strong component of the text is the inclusion of chapters on ethics and the future of paramedic research... The use of paramedic examples throughout the chapters will help students and other budding paramedic researchers connect with the subject matter and help them link theory, evidence and practice."

Professor Peter O'Meara, La Trobe Rural Health School, La Trobe University, Australia This practical

book provides a no nonsense guide for student and qualified paramedics looking to understand the key elements of research, and what it means for their profession. The authors explain key concepts and methodologies to help you get to grips with the nature of paramedic research and how it works in practice. By drawing on a wealth of cases and examples, research is placed firmly in the context of clinical practice. The book will enable you to critique research and to engage in small-scale research projects of your own. Emphasising what you need to know, the book includes information on:

- Knowledge that underpins practice
- Key elements of qualitative and quantitative research
- Research ethics and evidence based practice
- Undertaking a literature

patient). It includes clear definitions and describes risk factors, diagnosis and pre-hospital management of significant problems that occur in both early and late pregnancy and the immediate postnatal period. These are all situations that the pre-hospital practitioner may attend. This text and the accompanying integrated on-line and 'hands on' course will help practitioners identify and manage a range of time-critical obstetric emergencies specifically in the pre-hospital setting, and provides a structured examination and assessment technique as an aid to determining what treatments should be provided before transport, as well as when and how urgently transport should be initiated. POET is of relevance to paramedics, ambulance

staff, doctors, and nurses working in the emergency pre-hospital setting and midwives facilitating home births. It will also be of considerable value to medical and nursing practitioners working in Emergency Departments and unscheduled care settings where immediate access to skilled obstetric assistance is not available.

What is the difference between an academic and professional qualification? Who should get a professional qualification? Did you know that some professions can not be legally practised with a degree alone? Why get a UK qualification? Is it expensive to gain a British qualification? What is a chartered institute or society, and is it better than a non-chartered body? What is

the difference between a professional body and a trade union? These are all questions answered in this book which is designed to help individuals choose a career path and the right professional organisation. In today's world it isn't enough to have a qualification, you need to be able to meet with peers and use the valuable networks that are already in place to foster your profession. Your Professional Qualification provides a comprehensive survey of the qualifications available in the UK along with guidance on where they lead, entry requirements, where to apply and where to study. Derived from the vast and authoritative British Qualifications database, this important publication provides the first easily accessible guide to qualifications and how to get them in

The need for joint medical and midwifery care is stressed in the latest CEMACH report, with a recommendation that contemporary midwifery education prepares midwives for problems in pregnancy and adverse pregnancy outcome. Pre-conception care for women with medical disorders has also been stressed. Medical Disorders in Pregnancy is one of the first texts written specifically for midwives that provides an outline of common medical disorders that may be affected by pregnancy or which may cause pregnancy complications. For ease of use, all conditions
