Login Information: Create your login information. 2.

On behalf of the Organizing Committee for Pervasive 2008, welcome to the proceedings of the 6th International Conference on Pervasive Computing. The year 2008 was the second time in as many years that the Pervasive conference has attempted to "globalize": For the second year in a row the conference was held outside of Europe. The conference is seen as one of the most respected venues for publishing research on pervasive and ubiquitous computing and captures the state of the art in pervasive computing research. In 2008, as in previous years, the proceedings present solutions for challenging research problems and help to identify upcoming research opportunities. Pervasive 2008 attracted 114 high-quality submissions, from which the Technical Program Committee accepted 18 papers, resulting in a competitive 15.8% acceptance rate. There were over 335 individual authors from 27 countries, coming from a wide range of disciplines and from both academic and industrial organizations. Papers were selected solely on the quality of their peer reviews using a double-blind review process. The review process was carried out by 38 members of the international Technical Program Committee (TPC) who are experts of international standing. The TPC members were aided by 104 external reviewers. It was a rigorous review process, in which each paper had at least four reviews: three reviews provided by the Committee members and one review written by an external reviewer. The reviews were followed by a substantive liberation on each paper during an electronic discussion phase before the start of the Committee meeting.

The Advocate is a lesbian, gay, bisexual, transgender (LGBT) monthly newsmagazine. Established in 1967, it is the oldest continuing LGBT publication in the United States.

This book constitutes the refereed proceedings of the 6th International Conference on Pervasive Computing, PERVASIVE 2008, held in Sydney, Australia, in May 2008. The 18 revised full papers presented were carefully selected during two rounds of reviewing and improvement. The papers are organized in topical sections on sensing and activity recognition, applications for mobile devices, location in pervasive systems, platforms for pervasive computing, lessons learned from displays, games and health applications, as well as privacy and security.
