A modern and contemporary approach to Management Accounting, this brand new textbook written specifically for courses in the UK and Europe provides an essential grounding for students studying both traditional and new Management Accounting techniques.

Importantly, this complete text takes its readers beyond just the traditional accounting techniques, to place accounting information and the role of the Management Accountant in a broader organizational context. The text will provide a definitive education for tomorrow's "business-partner" Management Accountants and finance-literate business managers.

Suitable for students studying both traditional and new Management Accounting techniques, this text takes its readers beyond just the traditional accounting techniques, to place accounting information and the role of the Management Accountant in a broader organizational context.

Written with the decision maker in mind, this new text from Professor Will Seal, author of the highly successful Management Accounting, takes a practical, real-world approach to the subject. Suitable for one or two semester courses, the text is aimed at both specialist and non-specialist students at an introductory level. The book provides concise and manageable coverage of key topics and theory, and is supported by contemporary examples from both the manufacturing and services industries, ensuring it is relevant and engaging to both today's students and tomorrow's decision makers.

This book aims to explain the key issues in finance and management in higher education. It is a professional guide that is authoritative and comprehensive enough for professional accountants, yet accessible to non-finance professionals.

Suitable both for students and practitioners in the field, 'Management Accounting' provides comprehensive coverage of the theory and practice of the subject.

We are pleased to present this Global Edition, which has been developed specifically to acquaint students of business with the fundamental tools of managerial accounting and to promote their understanding of the dramatic ways in which business is changing. The emphasis is on teaching students to use accounting information to best manage an organization. Each chapter is written around a realistic business or focus company that guides the reader through the topics of that chapter. There is significant coverage of contemporary topics such as activity-based costing, target costing, the value chain, customer profitability analysis, and throughput costing while also including traditional topics such as job-order costing, budgeting, and performance evaluation. Many of the real-world examples in the Management Accounting Practice boxes have been revised and updated to make them more current and several new examples have been added. This Global Edition has been adapted to meet the needs of courses outside the United States and does not align with the instructor and student resources available with the U.S. edition.

This book is an adaptation of the successful US text "Cost Management" by Hilton, Maher and Selto, written specifically for an international audience. Major improvements include: Diverse and truly international examples of organizations - Examples used throughout the book are from all over the world and represent manufacturing, retail, not-for-profit, and service firms in many different countries. Completely restructured and rewritten text - The book has been rewritten, restructured and also shortened significantly to align content closer with international courses. Integral use of spreadsheets - Spreadsheet software is used for explaining techniques and making applications more realistic. In depth research - Summaries of international research studies that address important cost management issues have been updated and more references to recent research findings have been added. Intuitive explanation of accounting - The authors show directly how events impact the balance sheet and profit and loss account

Conveys a foundation knowledge of management accounting practice within the context of relevant theory. This book situates management accounting in its social and organisational context, before examining costing, decision-making, planning and control and performance measurement. It is illustrated with examples, exercises and questions.
