A new, definitive, translation of the Karl Marx and Frederick Engels' Communist Manifesto by American socialist luminary, Hal Draper.

Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

The most neglected sector of libertarian opinion might also be the most intellectually fruitful. It was pioneered by late-19th century anarchists and elaborated on by Samuel Konkin and Karl Hess in the 1970s. The new book by Derrick Broze and John Vibes is an excellent update to this outlook that takes account of the dramatic changes of the digital age. Their view is not about politics but rather its absence, and about the astonishing capacity of the social order to manage itself in absent of top-down control. See if you find this outlook compelling. If you love liberty, I think you will. - Economist Jeffrey Tucker

**\*\* The Sunday Times #1 Bestseller\*\*** 'One of the greatest political memoirs of all time' Guardian What happens when you take on the European establishment? Read as world-famous, provocative economist, and former Greece finance minister, Yanis Varoufakis, blows the lid on his battle with EU officials over the Greek debt crisis. Varoufakis sparked one of the most spectacular and controversial battles in recent

political history with his attempt to renegotiate Greece's relationship with the European Union. Yet despite the mass support of the Greek people, and simple logic of his arguments, he succeeded only in provoking the fury of Europe's political, financial and media elite. Exposing the real business taking place behind the EU's closed doors, Varoufakis reveals all in this fearless, personal account. Adults In The Room is an extraordinary tale of brinkmanship, hypocrisy, collusion and betrayal that will shake the European and economic establishment to its foundations. Varoufakis is sending out an urgent wake-up call to renew European democracy before it is too late. **\*\*ONE OF THE GUARDIAN'S 100 BEST BOOKS OF THE 21st CENTURY\*\***

The most important book on antitrust ever written. It shows how antitrust suits adversely affect the consumer by encouraging a costly form of protection for inefficient and uncompetitive small businesses.

Black Quantum Futurism (or BQF) is a new approach to living and experiencing reality by way of the manipulation of space-time in order to see into possible futures, and/or collapse space-time into a desired future in order to bring about that future's reality. This vision and practice derives its facets, tenets, and qualities from quantum physics, futurist traditions, and Black/African cultural traditions of consciousness, time, and space. Inside of the space where these three traditions intersect exists a creative plane that allows for the ability of African-descended people to see "into," choose, or create the impending future. Featuring visions by Rasheedah Phillips, Moor Mother Goddess, Warren C. Longmire, Almah Lavon, Joy Kmt, Thomas Stanley, PhD, and Nikitah Okembe-RA Imani, PhD.

Poverty. War. Bureaucracy. Divisiveness. Gridlock. Exploitation. Farmland degradation. Water shortages. Oil Spills. Nuclear meltdowns. Unemployment. Job dissatisfaction. Debt. Divorce. Depression. Anxiety. Addiction. Fear. Isolation. Loneliness. The 21st century world we live in is charging full steam ahead, seemingly at the speed of light. Though this breakneck pace has created many amazing marvels of modern technology, it has also created a more complex set of interlocking problems than our species has ever seen before. We all contribute to perpetuating faulty global systems in one way or another, but it takes a lot of humility to be able to admit that. By firstly focusing upon changing and improving one's own ways of living, and beginning with the mantra of "it's all my fault" – rather than immediately pointing fingers and telling everyone else to change – we can break down cultural barriers, inspire action, and make much more rapid progress to reduce the immense suffering that exists in this world. Directly or indirectly, it affects us all. It's time for a new paradigm; a new type of culture that incorporates the interests of all global citizens. It's All My Fault lays out how we got here, how we can move forward in this journey, and delves deep into personal insights and vivid experiences from the author's life. It describes a practical set of innovative ideas that have the potential to ultimately lead to the day in which many of our greatest challenges – such as poverty, homelessness, and underemployment – become a thing of the past.
