Nonprofit organizations face fierce competition for funding, especially during times of financial crisis. In order to effectively further their goals and make a long-term impact in the communities they serve, these organizations must remain financially viable and sustainable. This book equips students training to become better nonprofit leaders with the information and conceptual frameworks needed to ensure their organizations are financially sustainable. Using practical tips and illustrative case examples, it guides the reader to an understanding of the structures and processes of nonprofit organizations, and includes detailed coverage of financial analysis, budget management, cash flow, financial accountability and reporting, investing, fundraising, and organizational growth. This book is ideal for students, faculty, and practitioners in social service administration, human service leadership, public and community health, public administration, organization management, and health care administration and management.

This comprehensive introduction to fundraising management provides a thorough grounding in the principles underpinning professional practice. Much more than a 'how-to' guide, the book critically examines the key issues in fundraising policy, planning and implementation, and introduces the most important management tools available to the modern fundraiser. Fully revised and updated, this new edition of Fundraising Management is packed with examples and case studies from around the world. It covers every important aspect of the fundraising process, including: Planning Donor recruitment and development Community fundraising Corporate fundraising Legacy fundraising Trust and foundation

fundraising Legal and ethical frameworks for fundraising This groundbreaking text has been designed primarily to support students studying for the Certificate in Fundraising Management offered by the Institute of Fundraising, but is a useful text for all fundraising students and professionals.

A comprehensive text on how to develop, market, and sell your own product lines as independent labels or brands.

Thousands of students graduate from university each year. The lucky few have the rest of their lives mapped out in perfect detail - but for most things are not nearly so simple. Armed with your hard-earned degree the possibilities and career paths lying before you are limitless, and the number of choices you suddenly have to make can seem bewildering. Life After...Engineering and Built Environment has been written specifically to help students currently studying, or who have recently graduated, make informed choices about their future. It will be source of invaluable advice and wisdom to graduates on where their degree can take them, covering such topics as: Identifying a career path that interests you – and how to start pursuing it The worldwide opportunities open to engineering graduates Staying motivated and pursuing your goals Networking and self-promotion Making the transition from scholar to worker The Life After University series of books are more than simple 'career guides'. They are unique in taking a holistic approach to career advice – recognising the increasing view that, although a successful working life is vitally important, other factors can be just as essential to happiness and fulfilment. They are the indispensable handbooks for students considering their future direction.

This book gathers the Proceedings of the 20th International Conference on Interactive Collaborative Learning (ICL2017), held in Budapest, Hungary on 27–29 September 2017. The authors are currently witnessing a significant transformation in the development of education. The impact of globalisation on all areas of human life, the exponential acceleration of technological developments and global markets, and the need for flexibility and agility are essential and challenging elements of this process that have to be tackled in general, but especially in engineering education. To face these current real-world challenges, higher education has to find innovative ways to quickly respond to them. Since its inception in 1998, this conference has been devoted to new approaches in learning with a focus on collaborative learning. Today the ICL conferences offer a forum for exchange concerning relevant trends and research results, and for sharing practical experience gained while developing and testing elements of new technologies and pedagogies in the learning context.

本书全面、系统地介绍了TOC的概念、原理和应用方法(原理,方法,以及大量的实际案例),着重阐述"三个问题"的逻辑思考方法以及"五大步骤"的应用,是一本不可多得的好书.

This book reports on cutting-edge theories and methods for analyzing complex systems, such as transportation and communication networks and discusses multi-disciplinary approaches to dependability problems encountered when dealing with complex systems in practice. The book presents the most noteworthy methods and results discussed at the International Conference on Reliability and Statistics in Transportation and Communication (RelStat), which took place in Riga, Latvia on October 18 – 21, 2017. It spans a broad spectrum of topics, from mathematical models and design methodologies, to software engineering and data security issues, as well as practical problems in technical systems, such as transportation, and telecommunications.
