Discover how high-performing systems shape teaching quality around the world Producing highly skilled and committed teachers is not the work of a single innovative school or the aggregation of heroic individuals who succeed against the odds. In high-performing countries, the opportunities for teachers to learn sophisticated practices and continue to improve are embedded systemically in education policies and practices. Empowered Educators describes how this seemingly magical work is done—how a number of forward-thinking educational systems create a coherent set of policies designed to ensure quality teaching in all communities. . . and how the results are manifested in practice. Spanning three continents and five countries, Empowered Educators examines seven jurisdictions that have worked to develop comprehensive teaching policy systems: Singapore and Finland, the states of New South Wales and Victoria in Australia, the provinces of Alberta and Ontario in Canada, and the province of Shanghai in China.

Illustrated with 10 images. This book will be a descriptive grammar of the Esperanto language invented by L. L. Zamenhof, which will be complete and comprehensive in regards to a) the grammar of Esperanto as first outlined by Zamenhof in Fundamento de Esperanto and other foundational documents, and b) Esperanto as it is spoken today by the most committed Esperantists. (Proposed reforms to the Esperanto language will be discussed if they have serious support from a significant fraction of Esperanto enthusiasts). This book was started practically on a dare

from the August 2006 issue of Bob's Poetry Magazine, in which Robert Happelberg boasted that he could print a complete and comprehensive grammar of Esperanto in just one 6 by 7 inch page. While this is obviously wrong, it's not too far off the mark. When completed, this book will require several standard size (8.5 by 11 in the USA) pages, but will still be much shorter than a complete grammar of a natural language like English or Slovene. In view of this goal, the number of examples provided for each concept will be kept to a bare minimum. Those wishing to build their Esperanto vocabularies are also referred to the Esperanto textbooks. It is acceptable in the beginning to word the text in an accessible manner like in a textbook, but the goal should be for all the text to be technical with a full command of linguistic jargon.

Full and comprehensive coverage of all topics. Key Facts have been given at the beginning of each chapter to facilitate thorough revision and recall. Contains a large number of Solved Examples and Practice Questions. Answers, Hints and Solutions have been provided to boost up the morale and increase confidence level. Self Assessment Sheets have been given at the end of each chapter to help the students assess and evaluate their understanding of the concepts.

This US resource addresses some of the issues in teaching and evaluating thinking skills. It is aimed at staff developers, teacher educators, teachers and curriculum developers. It is intended that the resource be used by teaching staff to answer the following questions: * how can I tell how well learners are thinking critically? * how can I tell if my thinking skills curriculum is having an impact on my learners? This is 1 in a series of resources on the practical aspects of integrating thinking skills into teaching. Table of contents: * What is critical thinking? (example of thinking, a definition of critical thinking, our definition of critical thinking - an appraisal) * Gathering quality information on students' critical thinking (types of information gathering techniques, comprehensiveness of critical thinking coverage, indicators of quality) * Commercially available critical thinking tests (guidelines for examining tests, comprehensive critical thinking tests, aspect-specific critical thinking tests) * Making your own multiple-choice critical thinking tests (identifying the purpose of the test, making a table of specifications, drafting tests components) * Making your own open-ended information gathering techniques * Making decisions from information gathered on students' critical thinking (placement, grading, diagnosis and remediation. Decisions about effectiveness, developmental uses) * Summary and concluding remarks for each chapter.
