In Asia, the Cold War would heat up dramatically, raising anxieties and demanding sacrifices of Americans at home and on the battlefield. With the Soviet Union's entrance into the nuclear club, the fall of China to Mao Tse-tung, and the events on the Korean peninsula, many Americans were feeling vulnerable. The end of America's nuclear monopoly meant that American cities could face the possibility of atomic attack.

~~Washington D.C., 1953. The Cold War is heating up: McCarthyism, with all its fear and demagoguery, is raging in the nation's capital, and Joseph Stalin's death has left a dangerous power vacuum in the Soviet Union. The CIA, meanwhile, is reeling from a double agent within their midst. Someone is selling secrets to the Soviets, compromising missions around the globe. Undercover agents have been assassinated, and anti-Communist plots are being cut short in ruthlessly efficient fashion. The CIA director knows any news of the traitor, whose code name is Protocol, would be a national embarrassment and compromise the entire agency. George Mueller seems to be the perfect man to help find the mole: Yale-educated; extensive experience running missions in Eastern Europe; an operative so dedicated to his job that it left his marriage in tatters. The Director trusts him but Mueller has secrets of his own and as he digs deeper, making contact with a Soviet agent, suspicion begins to fall on him as well. Until Protocol is found, no one can be trusted and everyone is at risk . . .~~

Mankind is about to rise as a border world in a galactic cold war between the Telshean Union and the Republic Combine. Since the nineteen forties Combine treaties have formed shadow governments that now reverse engineer, steal and kill for technology in the race to produce the first human advanced tech patent. Fighting to fulfill their treaty with a patent they aim for the rights to form Earth's first representative government. Our emerging hero's in the contractor guild are caught in a torrent of new alliances as Daniel Young; Earth's first contractor fulfills the American treaty. The shadow governments and their secret operations while the Republic Combine and surprisingly Telshean Union reveal themselves to Earth. Political dialog takes place as the cold war heats up before Daniel secures Combine support to defend mankind from the Telshean Symbiote protocol. Fulfilling the deal with his new technology he leads combine forces in the retaking of another's home world lost to the Telshar and leaves the Symbiote's undergoing reversion to find the war surrounds Earth. Earth's emerging Terran Council is born as Union and Combine forces are destroying each other in the system. Mankind's first leader Althea Jefferson is elected from the American organization and rises to be the first Terran Chancellor. As the council starts to function Althea must preserve the council so their treaties may preserve them from the war. As war engulfs Earth, hopes lay with a Telshean prophet and a former Telshean politician.

~~"Seeing Stars" part 1 of 2! The Cold War heats up with a space-race disaster, as an alien force attacks both countries' space programs!~~

~~England, 1962. Linda Polanski knew her next mission could be her last. The KGB spy must rely on every ounce of her training to scope out enemy nuclear missiles. As the Cold War heats up, gathering intel is getting more dangerous and her bosses at the Kremlin are getting impatient...~~

Imagine slowly opening your eyes, feeling confused, and not knowing who you are, where you are, or how you got there. As your consciousness takes over, you suddenly realize that you are in a bed, covered in bandages, and in agonizing pain. Slowly, you figure out that you are in a hospital of some sort, but you cannot remember anything else. That is what happened to Lon Lindsey after a horrific Japanese banzai attack during World War II. After sustaining near life-ending injuries and severe traumatic stress, Lon embarks on a lifelong struggle to recover his psychological equilibrium, while continuing to serve his community and country. Lon's story begins during the Great Depression on the wind-swept high Wyoming plains, outside Laramie, on a cattle ranch originally homesteaded by his grandfather. Following a childhood of heartbreak and betrayal, Lon joins the Marines in 1943 and fights in the Pacific Theater, where he sustains injuries that require thirteen months of hospitalization. When the war ends, Lon accompanies his mother and his diplomat step-father to the Balkans and serves witness to the Communist takeover of Yugoslavia and Romania. Back in the States, Lon finds fulfillment as a civil servant in Los Alamos, New Mexico, famous for the development of the atomic bomb. As the Cold War heats up, the unique closed community evolves from a semi-military, government town to a more normal city, albeit one where the nation's most powerful atomic weapons are developed. It is there that Lon finally finds hope and healing.

Football promoter Mickey Rossetti never knew who he was or what he really wanted. Until it was almost game over. Combining international espionage with international business and the action-packed arena of American football, Bob Robustelli's debut Cold War-era spy thriller TeamWork delivers a tough-skinned, highly suspenseful addition to the genre that is certain to enthrall anyone who is a fan of hard-boiled fiction, or a fan of the great American pastime of football. For hard-partying, directionless Mickey, growing up the third son of the famous Hall of Famer Benny Rossetti from the New York Giants often seemed as tough as the sport that defined his family's lives. An all-American kid on the outside, Mickey had long been on a straight shot to epic addition that took a sharp, cocaine-fueled turn for the worse after his failed marriage. However, as he hobbles along at his family's business of promoting American football in Mexico, Europe, and the USSR, Mickey instead finds himself thrown into a game with perilously high international stakes. In TeamWork, fates are conjoined through a decades-long relationship between two spooks of matched skills, and dramatically opposing loyalties. Through a slew of mishaps, Mickey finds himself on the brink of real trouble with the FBI. Enter Pete Martin, a crusty old codger of a CIA operative. When Mickey eventually lands in Moscow on business, Pete is there to keep him under tight reins. Suddenly, the top is blown off of a KGB plot to take over the USSR and likely decimate the world. With a coup to take over the Russian government, an NFL game in Moscow, missing nukes, and a renegade Russian agent, TeamWork reveals that, when it comes to one man, the game may just be far from over. Bringing together business, football, and spooks as the Cold War heats up, this fast-paced, edgy debut spy thriller offers play-by-play thrills, laughs, and game-changing redemption. "A non-stop thriller, a breathtaking adventure, daringly original with flawed real characters and real world danger that will draw you in and hold you until the final word. I couldn't turn the pages fast enough."- best-selling author Richard Doetsch

~~In early 1960, as the Cold War heats up, the space race is on. With the future of space travel-and of the world-hanging in the balance, Paul Chavasse enters Tibet on a mission to rescue scientist Dr Karl Hoffner. He holds the key to victory to the moon.~~

Peter Baron: Special Agent - the lead hero of Intrigue magazine in three adventures, from the height of the 1960s James Bond craze. The Cold War heats up as Peter Baron targets I.C.E., a rogue organization attempting to steer the world machine.I.C.E., International Combine of Entrepreneurs (commonly called International Combine for Evil), was a recent outgrowth of the Cold War. They profited monetarily from friction between East and West, recruiting agents from among the castaways of professional spies. Some were dismissed from one country or another for double-dealing, selling secrets, or for arcane diplomatic reasons.Against this international menace, Special agent Peter Baron embarks upon a trio of dangerous assignments: To retrieve 'Deep Sleep, ' a biological agent; to guard agent 'Red Fox' from the Russians; and to locate a spy satellite under the shadow of Kiluaea volcano.

~~Examining the role of transnational radio broadcasting in the 20th century, this study compares and contrasts the goals and objectives of six broadcast networks: the BBC, Radio Free Europe, Voice of America, Radio Marti, Radio Free Asia, and Vatican Radio. The work traces the evolution--technical and programmatic--at each institution through world events such as World War II, the Cold War, the Solidarity Movement, the democratization of the Eastern bloc, and Tiananmen Square. Utilizing a series of case studies provided by selected authorities, the study demonstrates the effect of radio upon differing societies. Also, it explores options for alternative programming for each network, emphasizing their relationships to the evolving international political and media community in the late 20th century. The work will be of interest to scholars and students of mass media and international relations.~~
