The Renaissance, with its belief in a new world in the making and its eagerness to embrace any new form of thinking, may represent the first “New Age” movement—i.e., the first secular millennial movement on record. From the Renaissance onward European culture developed an ever-more secular strain of millennialism. In a sense, the longer God tarried, the more humans took over his job of bringing about the perfect kingdom.

we believe in radical hope. The Black Millennial Renaissance is a network of Black Millennials and their allies fighting to end systemic racism. In the spirit of our ancestors and their fight for Civil Rights, we are answering the call of the Black Lives Matter Movement to organize, educate, and empower society to heal the wounds of slavery and the decades of discrimination and oppression that have followed.

Millennials are the media's favourites. We can't hold on to jobs. We aren't buying houses. We don't save for retirement. If we go to university, we're racking up debt-and if we don't, we're slackers and dropouts. Here's the thing: if we don't own or achieve the traditional trappings of "adulthood," it's because the baby boomers have ruined it for us. They own the affordable housing. They snagged all the decent pension plans and are staying in the job market longer. They're eating up state-run pension programs-and oh, yeah...they brought the economy to a crashing halt a few years back. So why would we want to "adult" like them? It's not as if their way worked out well. In The Millennial Renaissance, millennial and business entrepreneur Lucy Cohen offers millennials an alternative to the path taken by the boomers-an innovative and attainable approach to both living well and realistically planning for retirement. Nothing you've been taught about retirement planning applies anymore. You're going to have to forge your own path in a world with new financial and career expectations. Your parents might not like it. The media certainly won't. But we're millennials, and we walk our own path.

You Can Predict the Future Throughout the centuries the future has been seen in dreams, in visions, and by seers. But you don't have to be a prophet or a visionary to predict what the future holds. Now, Ingo Swann explains how to understand and use the future-predicting ability that lies within. He identifies the different ways the future is revealed: Spontaneous forewarnings during dreams Spontaneous alerts that happen when awake Forewarnings and alerts communally experienced by numbers of people while sleeping or while awake Consciously controlled future-seeing achieved by seers Ingo Swann also presents fascinating, documented examples of prophecies that came true, ranging from those that foresaw the sinking of the Titanic to his own prediction of the fall of the Berlin Wall. Your Nostradamus Factor explains how you can develop your ability to foresee the future by: • Overcoming blocks to future-seeing • Tracking a particular subject and testing your predictions • Using astrology to help see the future, and • Paying close attention to your dreams. With the millennium right around the corner, Swann also offers startling predictions for the future of the environment, the economy, science, and society. (originally published in 1993)

Mr. Rowlands most famous and critically acclaimed book No More School (E. P. Dutton) literally launched the home-teaching movement. This collection of his essays will not just inform readers but also surprise and intrigue them. The topics range from politics, science, religion, technology, and music to economics, health, and sociology. And though his command of facts in each of these fields is admittedly not that of the specialist, the academic, or the reporter, what makes his views so riveting are the totally fresh perspective and unnumbered insights that he brings to these subjects.

While public health is important for revolutionary Cuba, providing medical services to the developing world is also a priority: 38,000 medical staff are engaged abroad; the largest medical school in the world (ELAM) has an enrollment of over 8,000 students from the Third World; and since 2004 over 1.3 million in Latin America and the Caribbean have had their eyesight restored. How has this small nation of 11.3 million people managed to save more lives in the developing world than all of the G-8 countries together? And what are its motives? This book, the result of four years of research in Cuba, provides an updated analysis of this extraordinary record.

Christian Dispensationalism, the Taiping Revolution, cargo cults in Oceania, the Baha'i Faith, and the Raelian Movement would seem to have little in common. What they share, however, is a millennial orientation--the audacious human hope for a collective salvation, which may be heavenly or earthly or both. Although many religions feature a belief in personal salvation, millennial faiths are characterized by the expectation that salvation will be accomplished for an entire group by a superhuman agent, with or without human collaboration. The Oxford Handbook of Millennialism offers readers an in-depth look at both the theoretical underpinnings of the study of millennialism and its many manifestations across history and cultures. While the term "millennialism" is drawn from Christianity, it is a category that is used to study religious expressions in diverse cultures, religious traditions, and historical periods. Sometimes, millennial expectations are expressed in peaceful ways. Other times, millennialists become involved in violence. The Oxford Handbook of Millennialism begins with a section that examines four primary types of millennialism. Chapters in the next section examine key issues such as charismatic leadership, use of scripture, prophetic failure, gender roles, children, tension with society, and violence. The rest of the book explores millennialism in a wide variety of places and times, from ancient Near Eastern movements to contemporary apocalyptic and new age movements, including the roles played by millennialism in national and international conflicts. This handbook will be a valuable resource for scholars of religious studies, sociology, psychology, history, and new religious movements.
