As they do so, the smaller dune ascends and spreads over the larger one. During this process, however, the fluid flow, which is deflected by the new dune, strongly erodes the front of the dune, which ejects a new dune. Because it is smaller and emerges downstream, the new dune moves faster and a gap opens up between the two dunes, " Franklin said.

The Deep Underground Neutrino Experiment (DUNE) is a leading-edge, international experiment for neutrino science and proton decay studies. Discoveries over the past half-century have put neutrinos, the most abundant matter particles in the universe, in the spotlight for further research into several fundamental questions about the nature of matter and the evolution of the universe — questions that DUNE will seek to answer.

Deep Underground Neutrino Experiment

Technology is a key aspect of the fictional setting of the Dune series of science fiction novels written by Frank Herbert, and derivative works. Herbert's concepts and inventions have been analyzed and deconstructed in at least one book, The Science of Dune (2008). Herbert's originating 1965 novel Dune is popularly considered one of the greatest science fiction novels of all time, and is frequently cited as the best-selling science fiction novel in history.

The Science of Dune provides the answers to these questions... and many more! Since its original publication in 1965, the Dune series has entranced generations of readers with its complex plotting, fascinating characters, grand scope, and incredible scientific predictions.

A guide to Frank Herbert's imaginary world offers scientific speculation on such topics as physics, chemistry, ecology, evolution, psychology, technology, and genetics.

"An exceptionally clear and penetrating study of the historically nuanced relationship between sf and the "discordant philosophies" of science, religion, and social theory."--Van Ikin, University of Western Australia. A literary genre that pervades 21st-century popular culture, science fiction creates mythologies that make statements about humanity's place in the universe and embody an intersection of science, religion and philosophy. This book considers the significance of this confluence through an examination of myths in the writings of H. G. Wells, Arthur C. Clarke, Philip K. Dick and Frank Herbert. Presenting fresh insights into their works, the author brings to light the tendency of science fiction narratives to reaffirm spiritual myths.

Including never-before-published chapters from Dune and Dune Messiah, original stories, and a new short novel by Brian Herbert and Kevin J. Anderson Frank Herbert's Dune is widely known as the science fiction equivalent of The Lord of the Rings, and The Road to Dune is a companion work comparable to The Silmarillion, shedding light on and following the remarkable development of the bestselling science fiction novel of all time. Herein, the world's millions of Dune fans can now read—at long last—the unpublished chapters and scenes from Dune and Dune Messiah. The Road to Dune also includes the original correspondence between Frank Herbert and famed editor John W. Campbell, Jr.: excerpts from Herbert's correspondence during his years-long struggle to get his innovative work published, and the article "They Stopped the Moving Sands," Herbert's original inspiration for Dune. The Road to Dune features newly discovered papers and manuscripts of Frank Herbert, and also "Spice Planet," an original sixty-thousand-word short novel by Brian Herbert and Kevin J. Anderson, based on a detailed outline left by Frank Herbert. The Road to Dune is a treasure trove of essays, articles, and fiction that every reader of Dune will want to add to their shelf. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

At the end of Frank Herbert's final novel, Chapterhouse: Dune, a ship carrying a crew of refugees escapes into the uncharted galaxy, fleeing from a terrifying, mysterious Enemy. The fugitives used genetic technology to revive key figures from Dune's past—including Paul Muad'Dib and Lady Jessica—to use their special talents to meet the challenges thrown at them. Based directly on Frank Herbert's final outline, which lay hidden in two safe-deposit boxes for a decade, Sandworms of Dune will answer the urgent questions Dune fans have been debating for two decades: the origin of the Honored Matres, the tantalizing future of the planet Arrakis, the final revelation of the Kwisatz Haderach, and the resolution to the war between Man and Machine. This breathtaking new novel in Frank Herbert's Dune series has enough surprises and plot twists to please even the most demanding reader.

The untold story of the twelve lost years between DUNE and DUNE MESSIAH based on Frank Herbert's own notes and hints.

From Dune to Rakis to Dune, the wheel turns full circle. From burning desert to green and fertile land and on again to burning desert ... the cycle is complete. The people of the Scattering are returning. Amongst them, mysterious and threatening, are the women who call themselves the Honoured Matres, adepts of an ecstatic cult. And on Rakis, become Dune, an ancient prophecy is fulfilled with the coming of the she-sheer, Sheeana ...

NOW A MAJOR MOTION PICTURE directed by Denis Villeneuve, starring Timothy é e Chalamet, Zendaya, Jason Momoa, Rebecca Ferguson, Oscar Isaac, Josh Brolin, Stellan Skarsg à rd, Dave Bautista, Stephen McKinley Henderson, Chang Chen, Charlotte Rampling, and Javier Bardem. Frank Herbert's classic masterpiece—a triumph of the imagination and one of the bestselling science fiction novels of all time. A mythic and emotionally charged hero's journey, Dune tells the story of Paul Atreides, a brilliant and gifted young man born into a great destiny beyond his understanding, who must travel to the most dangerous planet in the universe to ensure the future of his family and his people. As malevolent forces explode into conflict over the planet's exclusive supply of the most precious resource in existence—a commodity capable of unlocking humanity's greatest potential—only those who can conquer their fear will survive.

Climactic volume of the Dune trilogy in which an alien society achieves ecological salvation. Copyright © Libri GmbH. All rights reserved.

A biography of the science fiction writer, presented by his son, describes Herbert's childhood in Tacoma, Washington, his early years as a reporter and editor, his military service, and his struggles to become published.

Leto II, God Emperor of Dune, trades his humanity for immortality and, as the magnificent sandworm of Dune, desperately attempts to save humankind.
